From: mikesutherlanduk
Topic: 11 Message: 11

Everything is new! If only.

I've just got keen on listening to shortwave following acquisition of a 1958 Eddystone 730/4 receiver.

It's been checked out and re-aligned etc and I've just started to twiddle the knobs.

Am I wasting my time with this unit? Should I be looking at spending loads of cash to buy a modern unit - or can my Eddy pick up much the same stuff??

Regards,
Mike

Bill I use a grundig sattelite 800 millenium,,a grundig fr 200 windup, grundig mini world 100pe,an aiwa KA-818,a panasonic RF-B45. My scanners are a uniden bc245xlt TT,an Icom r3, a radio shack pro 2045 and I would like to have a RS pro 2006 if I can find one in good shape.

14. More info on the QSL Information Pages

Yahoo group: shortwavelistenersclub
Date: 2002-09-18 11:00:14 UTC
From: Martin Schoech
Topic: 14 Message: 14

More info on the QSL Information Pages

In the past days the pages of QIP - the QSL Information Pages for BC-DX'ers have been updated and the layout has been improoved.

All pages now contain a map of the country and give some additional (geostatistical) information about the country. For most countries even the number of active AM, FM and SW stations in given (thanks to CIA World Factbook).

A lot of countries and islands have been added, even if no qsl logs have been received so far .. Only very few maps and flags (for some small regions) are still missing.

You are invited to use the info given at the pages and you are also invited to further improove the pages by sending in corrections and your own qsl logs or the qsl logs of your dx-club. Please do not send any pictures unless these pictures show clandestine radio qsl cards or letters !

You can find the QSL Information Pages QIP at

http://www.schoechi.de/qip-indx.html or via http://listen.to/qip

At the moment QIP presents QSL logs from 228 radio countries with a total of 6128 radio-stations on these pages. There is even a special page for an easy download of the info pages and even of the flags and maps used in the pages ...

yours
Martin

From: catherine9393
Topic: 15 Message: 15

Dear all,I have recently purchased an MVT 7100.I've erected a long wire in an L shape 10 X 20m earthed at one end and the other connected to the telescopic antenna of the set and I can pick up almost b****r all. Has anyone please got any ideas what I may be doing wrong.PS I can't make a lot of sense out of the Yupeteru handbook.Maybe this has something to do with it.Many thanks Robin

From: Jerry Hemby
Topic: 15 Message: 16

Robin try NOT grounding the end of the wire and see if that helps.
Also if there is a terminal on the back of the radio for an external
antenna use it for your connection and remove the telescopic antenna
if it can be easily removed. If not just be sure it is pushed all the
way down.

THIS INFORMATION FOR EVERYONE:

If you have an interest in Ham Beacon Stations, whether
building one or just listening to them and knowing where
to find them, go to the following site for LOTS of information?

18. If you want to really hear good "stuff"

Yahoo group: shortwavelistenersclub
Date: 2002-10-22 14:41:05 UTC
From: Jerry Hemby
Topic: 18 Message: 18

Hello folks as you know some of these old radios are pretty good and in their days were maybe top of the line. BUT today if you can at all possible afford one of the new digital SUPER receivers by all means go for one of them if you are serious about listening.
Check ICOM, KENWOOD, YAESU and some of the others as well.
Remember that some of the HAM RADIO transceivers have general coverage receivers and will hear most everything so even if you don't have a license and can't transmit, you can still get one and have a number one receiver. Take a look at the Yaesu FT-840. While this is a great ham radio and I have one and talk all over the world. you can have a great receiver with one of them and they can be had now for around 5- 600 bucks. I know that's a lot of money but this is a great "set of ears" and cheaper than a lot of the high dollar receivers. AND YOU CAN ALWAYS SELL IT TO A HAM IF YOU NEED TO GET RID OF IT LATER. Just be sure if you get one of the ham radios that it says that it "HAS A GENERAL COVERAGE RECEIVER" and it will tune from 160 meters (1.8mhz) up to 30 meg (10 meters).

Just an idea because you can get two hundred or better in some of the Rat Shack radios and this would be a much better way to go.

Just go to ICOM, KENWOOD, OR YAESU on the internet and check them out. Places like AES, HRO, R and L ELECTRONICS, COPPER ELECTRONICS SELL THESE RADIOS SO CHECK THEM OUT TOO ON THE NET.

You might find a real deal there.

DO TAKE A LOOK AT THE YAESU FT-840 IT IS A GREAT RADIO.
It is BELOW 600 bucks almost everywhere now.

Jerry / W1NRA

19. Portable Short Wave Antennas

Hi all,
I just found this group, I guess I should give some info about my radio I use for shortwave listening. I have an old Lafayette HA-63 receiver, I have the E line going to a radiator for the ground and for the A1 and A2 I have about 150 feet of wires running around my apartment for the antannas. Can any one tell me other things I can do for an antanna for the radio? Thanks

29. Zenith R-7000-2

Yahoo group: shortwavelistenersclub
Date: 2003-11-14 05:53:39 UTC
From: Shane
Topic: 29 Message: 29

Hey all, Just wanted to let everyone know that I truly respect the short wave radio hobby and it is definitely something I am going to pursue in the future. Also wanted to let you know that my wife and I run a business, if you can call it that, on
EBay for a secondary income. We hit auctions and estate sales and find many different items. This weekend I bought a Zenith R-7000-2 Short Wave 12 Band Transoceanic radio. It is in almost perfect condition and when I plugged it up it is working perfectly. It is currently up for auction on EBay and I thought some of you might want to take a look. http://cgi.ebay.com/ws/eBayISAPI.dll?
ViewItem&category=15051&item=3058362377
. If your interested take a look. My user ID is lucky-jim in case the link doesn't work. Thanks! Shane

Dear readers of Clandestine Radio Watch,

at the CRW homepage
http://www.schoechi.de/crw.html

you may now find the 'final version' of
CRW 193

and the preliminary version of
CRW 194

Complete issues of CRW are published at the pages of

CRW - http://www.schoechi.de/crw.html (text version)
and
CRC - http://www.clandestineradio.com (html version, incl. pictures)

Logs, comments, qsl pictures etc. to CRW & CRC are always
welcome !

You may also find Clandestine Radio News via the
Clandestine Radio Channel at the HCDX-homepage.

yours,
Martin Schoech

36. QIP: Now 50.000 qsl logs from 10.000 stations

Yahoo group: shortwavelistenersclub
Date: 2006-02-13 13:24:36 UTC
From: Martin Schoech
Topic: 36 Message: 36

QIP: Now 50.000 qsl logs from 10.000 stations

I'm very pround to tell all qsl-card-collectors, that the

QSL Information Pages for BC-DXers - QIP

at http://www.schoechi.de/qip.html

now contain more than 50.000 qsl logs from more than 10.000 BC radio stations from around the world. These logs come from 241 different 'radio-countries' plus 46 different clandestine radio target areas. Included are qsls from LW, MW, SW and FM radio-stations. QSLs from pirates and from utility stations are not included (the only exeptions are those from time signal stations and from the Japanese lighthouse stations). The majority of the qsl logs is from 1996 until today.

These logs exists in 2 versions

- MS Exel files for all large world regions (only av. for subscribers)

- HTML pages for all visitors of the page (the zipped versions of these HTML-pages (for an easier and faster download) are again only av. for subscribers).

The subscription price in 5 EUR or 6 USD for 2 years. I prefer payments via Paypal (no credit cards please!). Other payments to my P.O.Box please.

I'd like to thank you all DX Clubs and all individual DXers for their support of QIP in the last 8 years! Please continue to send in your qsl logs to me. Contributors know that they get access to some MS Excel files as a thank you for their contribution.

yours
Martin from Eisenach

38. Human-buttons

Yahoo group: shortwavelistenersclub
Date: 2006-04-29 00:22:12 UTC
From: ae5@un.unhcr.biz
Topic: 38 Message: 38

This campaign is about Human beings, Democracy, UNHCR, Refugees, The Iraqis, Islam, Kurds, Human rights, Respect, Money, Donations, Angelina Jolie, Pavarotti, Giorgio Armani, Donors, Peace, History, Campaigns and about you if you care about these words.

Hi there,

I am SAM, an Iraqi refugee living in Lebanon at the moment; I have spent the last 10 years of my life as a refugee registered with the UNHCR in Beirut. The last 4 years, I have spent as an activist for peace and human rights (especially refugees and asylum seekers) on the Internet; I'm also books author and ebooks publisher. I have launched many campaigns to improve our situation as refugees in Lebanon and hopefully bring more understanding to our problems worldwide. I helped make many changes and improvements at the UNHCR office in Beirut; I used the Internet as the field for my activities (you can read more about that in my free ebook 'MY CAMPAIGNS'). All my ebooks are free and could be download from my sites.

This is my newest campaign, it's about the illegal and humiliating actions of the UNHCR, who using photos of refugees as banners and human-buttons to collect money. This is an abuse of the dignity and humanity of the refugees and must stop immediately and a clear public apology present by The United Nations High Commissioner for Refugees. My friends, I am talking about the pictures you can see here: http://www.cybamall.com/read

Also you can read my new campaign 'Urgent, we need smile' here:
http://unhcrlebanon.angelcities.com/email_me.htm

For more info about UNHCR and life of refugees you can read my free ebooks. I invite you as fellow humans and members of the world community to support my campaign by reading my article on my site and see the human-buttons. The campaign is to support and improve the UNHCR http://www.unhcr.org especially after the last scandals in the UN and UNHCR, just for example: http://www.mizzima.com/archives/news-in-2005/news-in-april/12-April05-22.htm

"We make demonstration and fast because the UNHCR office in Cairo did nothing for our problem..." http://news.bbc.co.uk/2/hi/africa/4440730.stm

Together we will build better world.

You could reach me fast via this form: http://unhcrlebanon.wagoo2.com/email_me.htm
and if you like to know more about me, you can google for my name 'osam altaee'.

Thanks
THE TRUTH WARRIOR

From: gvastianos
Topic: 39 Message: 39

EUROPEAN AMPLITUDE MODULATION AMATEUR RADIO GROUP

NEW YAHOO GROUP: http://groups.yahoo.com/group/eamarg/

This is a group for licenced amateur radio operators (HAMs) who are interested in the AMPLITUDE MODULATION (AM) mode of communications. The group exists to promote the AM operation in the HAM bands and provide information about operating events and technical matters.

EAMARG encourages regional AM activity insuring there is AM available somewhere on the amateur bands. Based on the fact that the majority of the AM calling frequencies in USA belong outside the european HF bandplans... one of the EAMARG main goals is to help in the establishment of AM calling frequencies that will be compatible with the HF bandplans of the european countries.

EAMARG future plans including the sponsorship of operating events and contests that will promote the use of Amplitude Modulation.

In order to join this group YOU MUST BE a licenced radio amateur. Only membership requests that include name and valid callsign will be accepted.
